Encoder (Line Count and Signal Type Optional)

DCM5xxxx series motors include an attached encoder, and the user can select line count and signal type of the encoder. The DCM5xxxx-1000 models include a 1000 line single-ended encoder and the DCM5xxxx-500 models include a 500 line single-ended encoder; while the DCM5xxxxD-1000 models include a 1000 line differential encoder and the DCM5xxxxD-500 models include a 500 line differential encoder. All encoders on the standard models have A signal and B signal. No Z signal is offered by the standard models, please specify the requirement when placing an order if the user needs an encoder which has Z signal.
